

FINGERPRINT DEVICE S905 *by BASIC*

Eliminate Manual Data Collection and Gain Control

BASIC Gatekeeper's S905 series is an innovative and versatile time clock with highly durable, yet elegant casing and a variety of fingerprint optical sensors.

3.5 inch Color Multimedia Screen

With its large 3.5" TFT for vivid color display/presentation and 8 dedicated function keys, the S905 is very user friendly and can be easily customized by users with special requirements (e.g., break in/out recording, tip entry, department transfers, etc.).

Features

- 1-touch 1-second user recognition
- Reads fingerprints and/or PINs
- Standard integrated proximity or smartcard reader
- Built-in serial and ethernet ports
- Built-in USB port allows for manual data transfer when network isn't available
- Standard integrated Wi-Fi/GPRS also available
- 8 user-defined function keys
- Real-time 1-touch data export 3rd party hosted & non-hosted applications
- Audio-Visual indications for acceptance and rejection of valid/invalid fingers

Installation Notes

Ethernet connection

- Client needs to provide a static IP address, gateway address, and DNS address or have a DHCP infrastructure* in place. Installation will program these into the device prior to shipping them to the client.
- Clock will be polled over the Internet. Client IT staff will have to make sure proper firewalls and connections are setup.
- Communication is over TCP/IP ports 80 & 443**. All non-troubleshooting connections to the clock are outgoing.
- When clock is behind a router or NAT device, a PC on the LAN with the clock will be needed for troubleshooting.
