

# PUNCH™ *by BASIC*

## Convenient Timekeeping

With Punch™ employee timeclock, you will capture accurate, centralized employee time data and ensure quick and orderly punch in/out. Instead of chasing down timecards and correcting errors, you can import employee time into a cloud-based time and attendance system.

Available with the convenience of optional magnetic card or fob activation, Punch™ is an affordable timeclock solution for office settings, call centers, healthcare, retail, hospitality, educational, manufacturing, and industrial workplaces.

In proximity mode, your employees don't have to touch the keypad. This makes Punch™ safer and more sanitary than timeclocks that require physical contact.

## Product Specifications

- Multi-frequency card reader supports all current RFID standards for the frequency ranges 125kHz and 134.2 kHz as well as the 13.56 MHz band, including NFC
- Capacity: 10,000 cards
- AC adaptor and power over Ethernet included
- Battery backup sold separately

## Features

- Ensure proper pay for time worked by job classification
- Eliminate clock errors and reduce abuses – make everyone's job easier
- Do away with paper timecards and tedious manual data entry
- Correlate clock-in/out to projects and job classification for analysis and resource allocation
- Stop losing productivity during shift changes with speedy contactless shift clocking
- Sync with cloud-based time and attendance system including mobile clocks for centralized time and labor management
