TOUCH™ *by BASIC*

Intelligent Timekeeping

Touch™ is an advanced touch clock with intelligent timekeeping built-in to speed up punching and reduce errors. Touch™ clocks employees almost immediately by reading their fingerprints, intelligently identifying each employee, and communicating directly with your time and attendance software over Ethernet or Wi-Fi.

- Dramatically reduces payroll costs
- Integrates with existing time management systems
- Eliminates badges/fobs/PIN numbers
- Eliminates buddy punching
- Reduces time spent at clock

Well-suited for most workspaces including office settings, healthcare, retail, hospitality, educational, manufacturing, and industrial.

Product Specifications

- 12.3 x 5.6 x 3 (W x H x D)

- RFID: EM4100 SERIES PROX CARDS

- PASSIVE PROX/RFID responder

- Touch-based optical fingerprint reader with FBI PIV and Mobile ID certification; FAP20 High performance live-finger detection Lumidigm Mercury Sensor: Lumidigm

- Capacity: 20,000 unique fingerprints

- Multi-frequency card reader, UltiCard* supports all major RFID standards for frequency ranges 125/134.2 kHz and 13.56 MHz, including NFC

- AC adaptor and power over Ethernet included

- Battery backup sold separately

Features

- Requires a unique fingerprint to clock in which prevents time theft

- Filtered prompts track breaks and meals for improved compliance

- Better match rate than other fingerprint scanners prevents hold-ups at the clock-in queue

- Collect exact clock data in real-time from every site and eliminate miscalculation, transposition, and other errors common to manual data transfer

- Can be combined with mobile clocks in the same timekeeping system for unified employee time data

- Antimicrobial coating and less repeated contact than PIN clocks helps protect against surface transmitted infections
